

DECLARATION OF CONFORMITY RoHS, REACH & SCIP

Dear Customers,

Herewith we confirm you that all the compounds used in the production of our goods are in accordance with the following European Directives, and Regulations:

- 2000/53/CE e s.m.i. Automotive market (end of life vehicles, heavy metal removal)
- 2011/65/UE e s.m.i. Restriction of the use of certain hazardous substances in electrical and electronic equipment (RoHS III & China RoHS III)
- 2012/19/UE e s.m.i. Waste of electrical and electronic equipment (RAEE)
- 1272/2008/CE e s.m.i. Regulation on the classification, labeling and packaging of substances and mixtures amending and repealing Directives 67/548 / EEC and 1999/45 / EC and amending Regulation (EC) no (CE) n. 1907/2006 [CLP]
- 1907/2006/CE e s.m.i. Regulation concerning the registration, evaluation, authorization and restriction of chemicals
(REACH), establishing a European Chemicals Agency, amending Directive 1999/45 / EC and repealing Regulation (EEC) no. 793/93 and Regulation (EC) no. 1488/94 of the Commission, as well as Directive 76/769 / EEC and Directives 91/155 / EEC, 93/67 / EEC, 93/105 / EC and 2000/21 / EC [REACH]

We also want to emphasize compliance with the Regulations listed below which are updates to the REACH Regulation

n.1907 / 2006 / EC:

2235/2016/UE amendment to Annex XVII Regulation (CE) n.1907/2006 regarding Bisphenolol A

2019/1021/UE Recast of Regulation (EU) No 850/2004 as regards POPs substances

(persistent organic pollutants)

2017/1000/UE Amendment to Annex XVII Regulation (CE) n.1907/2006 regarding PFOAs

2020/1149/UE Amendment to Annex XVII Regulation (CE) n.1907/2006 regarding diisocyanates

2020/784/UE Regulation amending Regulation (UE) n. 2019/1021 concerning POPs (persistent organic pollutants)

with inclusion PFOAs

Regarding the substances listed in Annex XVII, we point out the possible presence in some colored NBR compounds (of a different color from black) of the substance DINP CAS n ° 28553-12-0 for which the use in toys and articles for children is prohibited. Any presence is highlighted in the IMDS of the compound and at point 15 of the MSDS.

We also confirm that the compounds comply with the requirements of GADSL (Global Automotive Declarable Substance List) 2015 version 1.1.

Moreover, they do not contain any of the 211 substances listed in SVHC list of the REACH regulation updated on 19.01.2021, with the exception of some VMQ compounds, in which there is possible presence of D4 substances (Cas No. 556-67-2), D5 (Cas No. 541- 02-6), D6 (Cas n ° 540-97-6) in a concentration equal to or higher than 0.1% by weight, in the raw material used (raw mix).

If any restricted substance is present this is always stated in section 3 and 15 of the safety data sheet in accordance with the Regulation.

The O-rings supplied by TISAN Oy does not require a SCIP declaration (although there are D4 D5 and D6 in some compounds, it is not found above 0.1% in the finished product) **except for O-rings produced with M012 VMQ 70 TRANSPARENT** compound where the substance "Dodecamethylcyclohexasiloxane" identified with CAS: 540-97-6 and EC: n° 208-762-8 is contained in a concentration greater than 0.1% by weight and less than 0.3% by weight, included in the Candidate List of SVHC substances and registered in the **SCIP portal with n ° 6bb03b91-ca71-4164-ab4b-db426fe8c1fb.**

Information is provided in true good faith and is considered accurate at the date this letter is issued on the basis of the tests carried out on the preparations used and of the information provided by our suppliers. In any case our suppliers always inform us of any variations and we will promptly provide you with complete and updated information.

As regards NBR and EPDM (vulcanized with sulfur or peroxide) traces of lead and cadmium in the form of their oxides can be found, as well as impurities such as zinc oxide used (which are in any case below tolerance limit specified in Directive).

The presence of PAHs (PAH / PAK), present in carbon black and in some aromatic plasticizers, cannot be excluded but, from the declarations of the producers, levels are included in the limits required by REACH (with the exception of the restrictions envisaged in the context of direct and prolonged contact or repeated and short-term with human skin or oral cavities as well as for the toy sector as defined by regulation 1272/2013 which we do NOT confirm).

Best regards,

Tisan Oy
